

## PRESS RELEASE

**From the multi award-winning Mosaic Series evolves  
the new EVO3 Nova One!**

**For Immediate Release, February 2018** - IsoTek the leading brand of power conditioning solutions for hi-fi and home cinema systems has launched the EVO3 Nova One from the Multi-awarding winning Mosaic Series. The Nova One is an evolution on from the original GII Nova released over a decade ago but features a dramatically modified and improved clean power network. Nova One also represents a continuation of the Mosaic range of products, which allow owners to pinpoint specific products in their system incredible improvement through a clean power source.

While generically similar to the Titan One circuit, the Nova One is positioned specifically for source components that use less power. Within the filter network, greater emphasis has been placed upon high-frequency filtering. A nine section circuit consisting of both series and parallel filters dramatically removes both Common Mode and Differential Mode power line noise from the incoming mains supply. The middle sections of the filter featuring IsoTek's unique adaptive gating circuit which auto-sense the requirements of the connected load providing the ideal component specific filter level. A unique earth filtering circuit further enhances performance.

With over a 100,000 Amps (1840 joules) of instantaneous protection, harnessing IsoTek's unique sequential system which comes gradually, as needed, to avoid dynamic compression or restrictions, Nova One will increase component life as well as protecting it against dangerous power surges and voltage spikes.

Nova One is compact and elegant in its design and includes IsoTek's award-winning Premier power cable. Priced at £1,495.00, it will be available from February 2018.

### **Key Features and benefits:**

- Allow owners to pinpoint specific products in their system dramatic improvement through a clean power source
- Removes both Common Mode and Differential Mode mains noise
- Designed specifically for source components that use less power
- Dedicated single outlet delivers a clean, low distortion power supply for source components
- Internal wiring; solid core silver plated Pure Copper by Ohno Continuous Casting (PCOCC) with virtually an air dielectric encased in an outer sleeve of FEP (Fluorinated Ethylene Propylene)
- Suitable for all audio or AV systems
- Compact and elegant design measuring just 125mm in height and 75mm in width which allows six units to be placed side by side on an equipment rack
- Combine Nova One, Titan One and Genesis One for a full system upgrade
- Link units together so that only one input power cable is needed from the wall socket

- Supplied with IsoTek's award-winning Premier power cable
- Available with UK, EU, US, Australian, Swiss and South African outlets.

### Technical Specification:

<b>Number of outlets</b>	1+ linking outlet
<b>Outlet</b>	2300W
<b>Mains inlet</b>	10A IEC C19
<b>Mains voltage</b>	100 to 240V
<b>Mains frequency</b>	50 to 60Hz
<b>Dimensions</b>	75 x 125 x 470mm (W x H x D)
<b>Weight (boxed)</b>	10Kg

### About IsoTek

The UK Headquarters are in Winchester UK, IsoTek Power Systems Ltd is an English company that delivers award-winning power optimisation products for hi-fi and home cinema systems. IsoTek has offices in Switzerland and the United Kingdom with over 100,000 customers in over 45 countries. IsoTek has earned numerous accolades from specialist audio and AV publications worldwide and was voted most innovative brand in the Home Entertainment category at the PLUSX Awards, Germany 2016.

IsoTek was born with a singular aim: to create a better solution to the problem of poor mains quality, which restricts the performance of audio systems, through rigorous research and genuine innovation.
