

PRESS RELEASE

Introducing the new and compact almighty Titan One!

For Immediate Release, June 2017 - IsoTek the leading brand of power conditioning solutions for hi-fi and home cinema systems has launched the EVO3 Titan One from the Multi-awarding winning Mosaic Series. The Titan One is a highly compact state of the art high current low impedance power cleaner designed for high amperage equipment, such as power amplifiers, subwoofers and active loudspeakers. It features the award-winning Direct-Coupled© Design network trickled down from IsoTek's Ultimate Series Super Titan, but reconfigured in a more practical and compact form factor. Although less powerful than its bigger brother Titan One is still capable of delivering 3680W of continuous power to a single rear outlet. Multiple Titan One units can be linked together and positioned side by side on an equipment support rack using the "link cable", allowing you to avoid the need for multiple power cables from wall sockets for every unit.

Priced at £1,795.00 the Titan One is housed in an extruded and machined aluminium chassis, it has a dedicated single outlet that delivers a clean high current, low impedance and low distortion mains supply.

Key Features and benefits:

- Dedicated single outlet delivers totally clean low impedance, high current power for power amps, monoblocks, etc.
- Removes both Common Mode and Differential Mode mains noise
- Dedicated single outlet delivers a clean high current, low impedance, low distortion mains supply
- Unique single cell mains cleaning system that reduces Radio Frequency Interference (RFI) by 82dB (50 ohms standard) down to 5Hz frequency range
- Internal wiring; solid core silver plated Pure Copper by Ohno Continuous Casting (PCOCC) with virtually an air dielectric encased in an outer sleeve of FEP (Fluorinated ethylene propylene)
- Suitable for all audio or AV systems
- Compact and elegant design measuring just 125mm in height and 75mm in width which allows six units to be placed side by side on an equipment rack
- Combine Titan One with Genesis One for a Full system upgrade
- Link units together so that only one input power cable is needed from the wall socket
- Supplied with IsoTek’s award-winning Premier power cable
- A total of six Titan or Genesis Ones can be positioned side by side to create a rack width unit
- Available with UK, EU, US, Australian, Swiss and South African outlets.

Technical Specification:

Number of outlets	1+ linking outlet
Outlet (sine wave generation)	100W
Mains inlet	10A IEC C14
Mains voltage	100 to 240V depending upon model
Mains frequency	50 to 60Hz depending upon model
Dimensions	75 x 125 x 470mm (W x H x D)
Weight (boxed)	10Kg

About Direct Coupled Design©

Direct Coupled Design© concept, initially developed for the Titan and further enhanced for Super Titan to ensure optimal high-current filtering. Put simply, if a test meter were connected to Titan One, the reading would be akin to a very low resistance piece of wire from input to output. Other manufacturers use isolation transformers as part of their mains conditioning solutions, but IsoTek's Direct Coupled Design© eschews these devices because they break the cardinal rule of maintaining transient power.

IsoTek's proprietary KERP© technology secures a pure, symmetrical signal path through the unit, using the Titan One for each piece of equipment eliminates crosstalk and improves component-from-component isolation. In addition, a massive 135,000 Amps of instantaneous and repeatable surge protection safeguards valuable audio equipment against spikes and surges in the mains supply – no other device on the market can match this level of protection.

About IsoTek

The UK Headquarters are in Winchester UK, IsoTek Power Systems Ltd is an English company that delivers award-winning power optimisation products for hi-fi and home cinema systems. IsoTek has offices in Switzerland and the United Kingdom with over 100,000 customers in over 45 countries. IsoTek has earned numerous accolades from specialist audio and AV publications worldwide and was voted most innovative brand in the Home Entertainment category at the PLUSX Awards, Germany 2016.

IsoTek was born with a singular aim: to create a better solution to the problem of poor mains quality, which restricts the performance of audio systems, through rigorous research and genuine innovation.
