IsoTek Super Titan Power Conditioner

\$10,000 www.isoteksystems.com

We've had excellent luck with IsoTek products over the past few years, and the Super Titan has worked flawlessly in our publisher's reference system. Combining some radical ideas to power conditioning with vault-like build quality, electronic and mechanical noise is eliminated from your system with the Super Titan.

It's Neutrik connectors for the four power cords going out to your system is just another example of how everything under the hood of the Super Titan has been taken to the extreme. With a maximum capacity of 32 amperes (from a 110-volt AC line), the Super Titan requires you to call your electrician to get the maximum capacity it can deliver, but the results are well worth it. You've never heard your system sound so free of electrical artifacts until you plug into a Super Titan.
