SMART Power

A new pop-up window will ask you if you want to run the update.

If so, please click >> Yes <<.

The Download will start immediately. Depending on your connection your download / update will most likely only take only a couple seconds.

The SMART Power device will automatically restart in the background.

You can reload your browser page now. It will take some seconds before you are connected again.

Once the SMART Power device has fully restarted, the web interface will appear again.
