V5 Aquarius Power Conditioner

This multiple power cleaning system features six independent power cleaning networks – two for power amplifiers and other high-current devices, and four for preamplifiers, source and network components. The V5 Aquarius is an even bigger success than its popular predecessor – “It looks great [and] brings the best out of the sound of your equipment.”

V5 Titan Power Conditioner

As with every other V5 member featured here, the V5 Titan has been extensively reworked from its predecessor entirely for the benefit of the sound quality. The changes fall into two categories: circuit improvements that create measurable improvements, and revisions to the Direct Coupled fully star-earthed architecture that are more ‘sonic good housekeeping’. Such meticulous tweakery has paid off: “The V5 Titan lets your power amplifier sound like it was designed to sound.”

V5 Sigmas Power Conditioner

A third 16A high-power outlet, boosts in amperage and current handling capacity, and an improved direct current resistance; this mains power cleaning product might be considered ‘evolution’ rather than ‘revolution’ on paper, but in real-world performance terms it’s a honking great big step forward. “The V5 Sigmas makes your system sound more cogent and coherent in a way the EVO3 models only hint at...”

V5 Syncro Uni 16 DC Blocker

This compact DC blocker has been designed to, in IsoTek’s words, “dramatically reduce/silence transformer vibration and hum from the transformers within electronic equipment, generally mechanical vibration”. It’s most effective when used between a power socket and an amplifier (or a power distribution device), and its effectiveness is profound, delivering “an enhanced sense of intimacy and realism”.

For more than two decades, IsoTek has been producing a range of ‘clean power’ products for hi-fi and AV systems, utilising its unique clean power technology and capable of revolutionising the performance of the humble to the

high-end. That IsoTek gear is implemented in, and used for demonstration alongside, products from reputable hi-fi companies is an advert for the brand’s expertise in and of itself.
